457) Abstract:

- B In a <sup>A</sup> method for selecting a telephone number by means of voice control, the telephone numbers which can be selected are stored, and for each telephone number which can be selected at least one identifier, such as a name is stored. In the storing phase, the identifier is pronounced and divided into one or several sub-identifiers, which are stored, and to which information on the ~~said~~ telephone number is linked, wherein the telephone number mentioned in the selecting phase can be <sup>dialled</sup> ~~dialled~~ either by pronouncing said sub-identifiers in any order according to a combination or partial combination of the sub-identifiers.
